

APIX FAQ

What is our current cost?

Priced on a license base at extremely affordable prices specially for our API members
Per License User - \$800 + GST for unlimited usage per annum.

How frequently is APIX data updated?

APIX Data will automatically refresh every night. New data for property sales and attributes ranges between daily, weekly and fortnightly depending on the state.

What data coverage do we have?

National sales data coverage from the states Valuer General. If the property is or has been listed on the market for sale or lease, we will have data on it.

Can we save our own data into APIX?

At this stage no – however this is currently in the road map for Stage Two release.

How secure is APIX data?

The security of data is something API and Valocity takes very seriously.

The site uses SSL which means that all requests and responses are sent through secure tunnels. We also require authentication for users to be able to access the site and view its data.

What is planned for the future with APIX?

APIX is specifically designed for the Valuation Market – to support Valuers.

Enhancements and Improvements will occur based on Valuer feedback. There will be an APIX Working Group organised by the API to determine future developments and enhancements. From this feedback, the road map for planned builds and updates will be generated accordingly.
